As a recent graduate with a degree in Theatre, Performance and Event Design, I have undertaken several work placements including working in the art department for a BBC drama production.

I would describe myself as highly motivated, a good time manager, full of energy and a bubbly character! My most important skills are being able to work independently or in a team and I have also demonstrated that I can be an effective team leader. With over four year's experience of using design software, I can illustrate my designs quickly and clearly.

I am looking to secure a position with your organisation where I can immediately add value and develop my skills further.

## Interests and Achievements

I was selected with another student to represent our school on a trip to Uganda with three members of staff. We visited a school and an orphanage to learn about the differences in how they teach and their lifestyle.

At Sixth Form, I was part of the backstage crew for a college production based on the Grimm's Tales.

My job was to read the script and list what props were needed. I then had to make each prop and was in charge of the props table during the shows.

During my free time, I like to paint canvases for friends and family.
